Query potentially interested rent house by specific features (area, rent)

- Set the filtering expression as you like (e.g. Available area is larger than 1500 square feet)
- Click the “Do Query” button
- The total number of qualified houses would be shown in the bottom right corner. And the list of information of those houses would pop up.
- Click the introduction button in the information window, it would transfer you to the origin web page.

- Search user interested place
 - User could input the address they want to look at, or they could also input their current location by directly click the following button
